HENDRIK SCHOEMAN, PE, PMP

DATA CENTER CONSTRUCTION EXECUTIVE | DIGITAL INFRASTRUCTURE | CAPITAL PROGRAMS

Registered Professional Engineer • PMP • U.S. Navy Civil Engineer Corps Veteran
Fort Lauderdale, FL | navycec@gmail.com | linkedin.com/in/hendrikschoeman

EXECUTIVE PROFILE

Construction executive, Registered Professional Engineer, PMP, and former U.S. Navy Civil Engineer Corps officer with 20+ years leading hyperscale data centers, mission-critical facilities, federal infrastructure, and complex capital programs. Combines owner-side engineering judgment, program governance, contractor leadership, commissioning readiness, and operational transformation. Trusted to stabilize high-risk programs, align multidisciplinary teams, improve predictability, and deliver infrastructure supporting cloud and AI growth.

EXECUTIVE VALUE

Hyperscale & AI Infrastructure
Meta and Switch data center programs; greenfield, brownfield, retrofit, utility and substation integration.

Program Leadership
Portfolio governance, KPIs, executive reporting, risk management, contractor performance, and standardized delivery systems.

Owner-Side Delivery
Design through turnover, commissioning readiness, operational handoff, and cross-functional stakeholder alignment.

Federal & Global Construction
NAVFAC contracting and delivery leadership across the United States and overseas contingency environments.

PROFESSIONAL EXPERIENCE

INDEPENDENT CONSULTING | Strategic Infrastructure Consultant & Technical Advisor — 2025-Present

Fort Lauderdale, FL

- Advise data center, infrastructure, and expert-network clients on capital delivery, power and utility integration, equipment ecosystems, commissioning, and operational risk.
- Translate owner, engineering, contractor, and supplier perspectives into decision-ready guidance for digital infrastructure and mission-critical investments.

SWITCH | Regional Data Center Construction Manager — 2024-2025

Atlanta, GA

- Led owner-side construction across a regional hyperscale portfolio, including four-building brownfield retrofits and a major greenfield campus with phased expansion, utility coordination, fiber routing, civil works, and substation integration.
- Directed multidisciplinary delivery through construction, commissioning readiness, turnover, and operational handoff while aligning designers, contractors, vendors, utilities, and internal stakeholders.
- Established disciplined issue escalation and field coordination to protect safety, quality, schedule, and operational continuity across concurrent mission-critical workstreams.

META | Facilities Integration Engineer — 2021-2024

Prineville, OR

- Supported owner-side integration and readiness across a hyperscale campus of multiple approximately one-million-square-foot data center buildings, each with substantial mission-critical power capacity.
- Connected design, construction, commissioning, facilities, and operations teams to surface interface risks early and improve turnover readiness for complex greenfield and retrofit programs.
- Developed repeatable stakeholder and readiness workflows that improved visibility, accountability, and cross-functional execution.

RELYANT GLOBAL | Vice President of Construction — Prior Role

Maryville, TN / Global

- Led a portfolio of approximately 80 U.S. government construction projects and rebuilt delivery discipline across project controls, vendor management, accountability, and executive reporting.
- Drove a turnaround program that restored performance on roughly 80% of challenged work by clarifying ownership, strengthening field leadership, and enforcing measurable operating cadence.

U.S. NAVY CIVIL ENGINEER CORPS / NAVFAC | Officer and Construction Leader **1999-2019**

United States and Overseas

- Led federal construction, engineering, contracting, and facilities programs across domestic and overseas assignments, serving in Contracting Officer and Contracting Officer Representative capacities.
- Managed design-build, infrastructure, contingency, and installation-support programs involving complex stakeholders, regulated procurement, operational constraints, and high-consequence delivery environments.
- Authored a preconstruction execution playbook adopted regionally and later elevated for broader NAVFAC use, improving consistency, readiness, and risk control before field mobilization.

SELECTED LEADERSHIP IMPACT

- Directed capital programs ranging from tens of millions of dollars to large strategic infrastructure portfolios where schedule, reliability, safety, and operational continuity were inseparable.
- Built governance systems, KPIs, playbooks, and executive reporting that converted fragmented activity into accountable, decision-ready program management.
- Led through ambiguity and change across owner, government, contractor, designer, utility, and operations organizations while maintaining factual, transparent communication.
- Known for identifying problems early, clarifying ownership, and creating durable delivery systems rather than relying on heroic recovery.

CREDENTIALS & EDUCATION

Registered Professional Engineer (Arizona) | Project Management Professional (PMP) | U.S. Navy Civil Engineer Corps Veteran

Master's Degree, Oregon State University

CORE EXPERTISE

Digital Infrastructure • Hyperscale Data Centers • AI-Ready Infrastructure • Capital Program Leadership • Owner’s Representation • Construction Management • Commissioning Readiness • Utility & Power Integration • Greenfield & Brownfield Delivery • Federal Contracting • Design-Build • Governance & KPIs • Risk Management • Operational Turnover • Executive Stakeholder Alignment
